

Thursday, 18 March 2021

Dear parents,

We will finish the third round of testing for student's early next week. We have tested the vast majority of students 3 times since they returned to school on 8 March 2021, with no positive results so far. We would like to thank students for the good behaviour and thank you for your continued support.

Testing at home

As per government guidelines, students will be moving to twice weekly, rapid COVID-19 testing at home. We will be sending home COVID-19 testing kits with your child from this week. Please make sure your child tests themselves **twice a week, 3-5 days apart, in the morning before school if possible and, if not, the evening before.**

Your child should also **continue testing twice a week, at home, throughout the Easter school holidays.**

Each student will be given a total of 9 tests which will be enough to cover until we return to school after Easter.

There is also a useful video to show you how to take the test [here](#).

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you how to take the test.

There is no need to keep used test equipment after the test result has been reported. You can put it in your normal bin (household waste).

This does not replace symptomatic testing. If your child has symptoms, you should self-isolate immediately, book a PCR (lab) test and follow national guidelines.

This does not replace testing for those with symptoms. If you have symptoms your child must self-isolate immediately, book a PCR test and follow national guidelines, including informing the school

Reporting results

It is important that results of test are reported online straight away, even if your child's result is negative or void. It's easy to do at www.gov.uk/report-covid19-result.

Results can also be reported via telephone by calling 119 (free from mobiles and landlines). Lines are open every day, 7am to 11pm.

Testing for parents, households and bubbles twice a week

A reminder that regular rapid testing is now also available for parents, their households and support or childcare bubbles. The government is encouraging all families to participate in twice weekly testing to help stop the spread.

Parents and other adults in the household can access tests by:

- Ordering tests online www.gov.uk/order-school-household-tests
- Getting an assisted test at work, if it is available
- Attending a test site to get tested (where you will be able to see how to take the test) or pick up tests to do at home.

To find out more on school household testing visit <https://www.gov.uk/guidance/rapid-lateral-flow-testing-for-households-and-bubbles-of-school-pupils-and-staff>

What should you do after the test?

If anyone tests **positive you, your household, any support bubbles you are part of** should self-isolate immediately in line with NHS Test and Trace guidance for 10 days.

You need to report your result to both [NHS Test and Trace](#) and the school.

You should [order a confirmatory PCR test](#) if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at School/college).

If the result of the test is **unclear (void)** you should do another test.

A negative result does not guarantee that you are not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands and observing social distancing.

If you or anyone in your household gets symptoms of the virus you should follow [national guidelines](#) on self-isolation and testing.

PCR and LFD testing during Ramadan

The British Islamic Medical Association's view is that taking polymerase chain reaction (PCR) or lateral flow device (LFD) tests during Ramadan does not invalidate the fast.

People may feel more comfortable doing the tests when they are not fasting. In this case, with the move to home-testing, tests can be carried out at any time.

Yours sincerely

James Hadley
Headteacher

FREQUENTLY ASKED QUESTIONS

Do I need to give consent?

Students and parents do not give written consent to take part in the home testing programme.

Once you open the kit you should take and report the results of the tests to [NHS Test & Trace](#) and to school, regardless of the result (positive, negative, or void).

Can my child take the test themselves?

Students aged 18 and over should do the test themselves and report the result, with help if they need it.

Students aged 12-17 should do the test themselves with adult supervision. The adult may help the student to take the test if they need support.

Students aged 11 must be tested by an adult and the adult must report the result.

Reporting problems or issues with testing

If there is an issue with the test kit, for example something is missing, please report it by calling **119** and please also tell the school

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>

What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These

individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare Products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

How are LFD tests different to PCR tests?

There are 2 main types of test to check if you have coronavirus:

- Polymerase Chain Reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- Lateral Flow Device (LFD) tests detect proteins called 'antigens' produced by the virus

LFD tests give rapid results, in 30 minutes after taking the test.

What does it mean if my child has a positive result?

If your child has a positive antigen LFD test result they, their household and any support bubbles they are part of should self-isolate immediately in line with NHS Test and Trace guidance for 10 days. You need to report your result to both NHS Test & Trace and the school.

You should order a confirmatory PCR test if you are testing at home.

You can [book a test here](#).

What does it mean if my child has a negative result?

A negative result does not guarantee that your child is not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

What if my child has a void result?

If the result of the test is unclear (void), they should take another one. If the next test is also void, your child should take a PCR test. You can [book a test here](#).

All test results need to be reported to both [NHS Test & Trace](#) and the school.

Do I need to send the test to a lab?

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to take the test [here](#).

How do you report the result?

You will need to report your test results, if it is positive, negative or void, using this [service](#). You also need to tell the school the test result. You will receive a text or email from NHS Test & Trace confirming that you have reported your test result.

All test results need to be reported to both [NHS Test & Trace](#) and the school.

Can I or someone else in my household use a test kit sent home from school?

No, however whole families and households with primary school, secondary school, and college age children, including childcare and support bubbles, will be able to test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker www.gov.uk/find-covid-19-lateral-flow-test-site or check your local council website)
- collect tests to do at home, find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://www.test-and-trace.nhs.uk)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on www.gov.uk/order-coronavirus-rapid-lateral-flow-tests

There is [more information available about testing for households and bubbles of students](#).
